

How ARMS Rewards work.

ARMS Rewards are internal tokens that represents a claim on 2ACoin on deposit at the ARMS Central Repository.

ARMS Reward Creation

ARMS Rewards come into existence when a 2ACoin is deposited into the ARMS Central Repository. 2ACoin (ARMS) can be deposited by various means and methods.

1. 100% of the ARMSBOOK.COM mining pool fees (in 2ACoin) is deposited into the ARMS Central Repository and minted into ARMS Rewards.
2. When a user transmutes 2ACoin into ARMS Rewards.
3. When a user purchases ARMS Rewards, the ARMS Reward Purchase System, purchases Bitcoin, purchases 2ACoin with this Bitcoin, then sends the 2ACoin to the ARMS Central Repository to be minted into ARMS Rewards to be distributed to the user.
4. When the user subscribes, instead of purchasing ARMS Rewards, via the process above.

ARMS Reward Burning

ARMS Rewards are burnt out of existence when a 2ACoin is withdrawn from the ARMS Central Repository to a user's account. 2ACoin (ARMS) can be withdrawn from the ARMS Central Repository by various means and methods.

1. A user requests a 1:1 conversion of ARMS Rewards to 2ACoin.
2. A user performs a "Cash Out" of their ARMS Rewards for either Bitcoin or Litecoin. The ARMS Reward Cash Out System, converts ARMS Rewards to 2ACoin, Then sells that 2ACoin on the open market with proceeds being distributed to the user.

ARMS Reward Dispersion

ARMS Rewards are dispersed to users of the platform for various actions they perform such as creating new posts and comments, or reacting other's content. The ARMS Rewards Dispersion System monitors the amount of fees that the ARMSBOOK.COM

mining pool is generating and raises and lowers the amount of ARMS Rewards being distributed from the mining pools fees to users of the platform.

ARMS Rewards Interest

A feature of the ARMS Central Repository allows the user to earn interest on their ARMS Rewards as they hold them in their account. The amount of interest that a user earns on their ARMS Rewards depends on the number of guns the user has collected. Guns are collected as more and more ARMS Rewards pass through a user's account, this increases their lifetime ARMS Rewards count. When ARMS Rewards meet a particular level, a new gun is issued to the user and their interest rate is raised.

ARMS Rewards Tipping / Transfer

A user can tip ARMS Rewards to another user or directly transfer them to another user as well. This process will increase the receiving parties Lifetime ARMS Rewards. A small 0.5% fee is deducted to the ARMS Central Repository for earmarking for platform distribution and MAG Club income.

ARMS Rewards Conversion

ARMS Rewards can be converted at a 1:1 ratio into 2ACoin (ARMS) when the user would like to make an external transfer.

ARMS Rewards Transmute

2ACoin (ARMS) can be transmuted into ARMS Rewards at a 10:9 ratio.

ARMS Rewards Cash Out

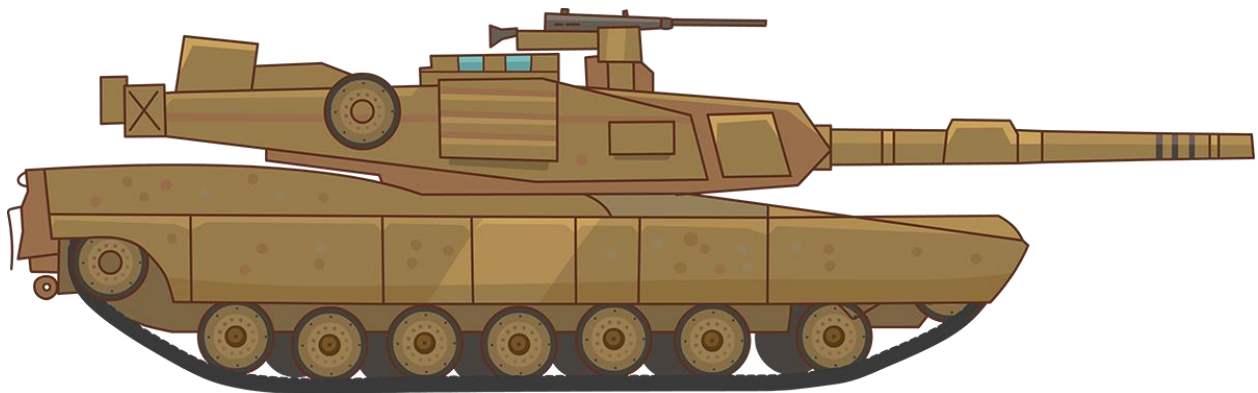

A user can perform a "Cash Out" of their ARMS Rewards for either Bitcoin or Litecoin. The ARMS Reward Cash Out System, converts ARMS Rewards to 2ACoin with the ARMS Central Repository. Then sells that 2ACoin on the open market with the proceeds being distributed to the user.

ARMS Reward Yearly Conversion

Every year on January 1st all ARMS Rewards, held by all normal users are automatically converted to 2ACoin. This conversion ensures interest rate payout is able to be maintained among other items to be discussed at a later time.

ARMS Rewards Guns

A list of the current guns and the amount of ARMS Rewards it take to acquire them.

M1 Abrams Tank

50,000.00000000 – 100,000.00000000 ARMS Rewards

Interest Rate: 10%
